Notice of Allowability	Application No.	Applicant(s)	
	10/808,089	SUEKANE ET AL.	
	Examiner	Art Unit	
	Holly Rickman	1773	
The MAILING DATE of this communication appe All claims being allowable, PROSECUTION ON THE MERITS IS herewith (or previously mailed), a Notice of Allowance (PTOL-85) NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RI of the Office or upon petition by the applicant. See 37 CFR 1.313	(OR REMAINS) CLOSED in this app or other appropriate communication GHTS. This application is subject to	olication. If not included will be mailed in due course. <b>Th</b>	
1. X This communication is responsive to 6/9/05.			
2. X The allowed claim(s) is/are 1 and 10-23 now renumbered 1	<u>1-15</u> .		
<ul> <li>3. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). <ul> <li>a)</li></ul></li></ul>			
Attachment(s)  1. Notice of References Cited (PTO-892)  2. Notice of Draftperson's Patent Drawing Review (PTO-948)  3. Information Disclosure Statements (PTO-1449 or PTO/SB/0 Paper No./Mail Date  4. Examiner's Comment Regarding Requirement for Deposit of Biological Material	6. ☐ Interview Summary Paper No./Mail Date 8), 7. ☐ Examiner's Amendre	ė	

Art Unit: 1773

## REASONS FOR ALLOWANCE

Page 2

The following is an examiner's statement of reasons for allowance: the claims are allowable over the closest prior art to Bian et al. (US 6077586). Bian et al. teaches a thickness range of 10-200 Angstroms. A goal of the invention is to produce a magnetic recording medium exhibiting single switching behavior as argued by Applicant (i.e., no antiferromagnetic coupling). The prior art teaches that the thickness of the Ru layer affects the type of coupling between adjacent magnetic layers – i.e., ferromagnetic or antiferromagnetic- (see Parkin reference of record). However, Bian et al. is directed to a medium having single switching behavior so there is no motivation to modify the thickness of the Ru layer taught therein to achieve the claimed thickness of 3 to less than 10 Angstroms thereby achieving antiferromagnetic coupling. As such, the reference also fails to teach or suggest a structure having  $H_{ex}$  exerted by the upper ferromagnetic layer on the lower ferromagnetic layer and an antiferromagnetic interface exchange energy density  $J_{ex}$ .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Holly Rickman whose telephone number is (571) 272-1514. The examiner can normally be reached on Monday-Friday 9:30-6:00.

Application/Control Number: 10/808,089

Art Unit: 1773

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on (571) 272-1284. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
